

Illinois Department of Transportation

Memorandum

To: J. C. Slifer Attn: K. Hemstreet
From: M. J. Macchio By: Peter J. Frantz
Subject: Hazardous Waste Review*
Date: April 15, 1991

*FAP 340 (431)
ADDENDUM #1
Job No. P91-315-86
Lake-Will Freeway
From I-55 to I-80
Cook, Will, and DuPage Counties

Attached is a copy of the Preliminary Environmental Site Assessment conducted by the Illinois State Geological Survey (ISGS) for the subject project as described in your Hazardous Waste Survey Request.

If volatile organic testing was done for this project and the attached (ISGS) report indicates no detection of leaking underground storage tanks (LUST's), then further soil boring and sample analysis work for underground tanks is not required.

It is the opinion of this office that the attached (ISGS) report's conclusion of no or low risk meets the requirements of Departmental Hazardous Waste Policy LEN-13, and no additional preliminary testing for this project is necessary.

However, the findings and recommendations of the report should be carefully considered.

Aside from the 28 agencies and 98 individuals whose comments are referenced above, a large amount of additional comments, petitions, form letters and surveys were submitted as well. In total, over 19,500 comments, petitions and survey cards were submitted; approximately 78% were in support of the I-355 south extension, with the remaining 22% opposed. Details pertaining to the specifics are listed below.

Record of Comments Received

In total 2,336 comments were received during the Draft SEIS review period extending from the release of the Draft SEIS (December 29, 2000) until April 30, 2001. Of the 2,336 comments received, 1,654 (71%) supported the project, 594 (25%) opposed the project and 88 (4%) had no position. Extracting the comments that did not state a position on the project, 74% of the people commenting favored constructing the I-355 south extension.

Record of Individual Letters

Of the 2,336 comments received, approximately 1,400 were individual letters sent by citizens and organizations prior to June 2001. 169 individual letters were submitted on personal letterhead in support of the project, compared with 20 opposed. Additionally, 792 form letters were submitted in support of the project, compared with 386 opposed.

Record of Petitions Received

Since the initiation of the Supplemental EIS, almost 14,000 petition signatures have been received. Petitions were constructed to either favor or oppose the I-355 south extension. The Southern Alliance for the Extension (SAFE) coordinated a support petition that generated 10,556 signatures in support of the I-355 extension. Additionally, the Village of Orland Park coordinated a support petition that totaled 474 signatures. The Lincoln-Way South Corridor Against the Tollway (LSCAT) coordinated an oppose petition that generated 3,174 signatures

that opposed the I-355 south extension. In summation, 11,030 (78%) signatures were received in support of the I-355 south extension compared with 3,174 (22%) signatures that were opposed.

Record of Surveys Received

A private business entity in the Village of New Lenox, located within the southern portion of the Project Corridor, distributed a survey to every address within the Village limits (9,521). The survey attained greater than a 36% (3,446) response rate. Of the 3,446 surveys returned, 2,940 (85%), support the I-355 south extension, compare with 492 (14%) that were opposed and 14 (1%) that had no opinion.
